

How to learn from college?

calculus homework

But now it is necessary to talk about the main thing: how to study in college so that it was not painfully ashamed of the time spent in the walls of this institution. The answer is as always simple - on perfectly, but how exactly to achieve such a result?

It is worth noting here that the college study contracts and state employees. If the first study does not seem so complicated and tedious, then the second will have to be pretty sweat to get the long-awaited and vital scholarship.

As a rule, teachers are not treated as strictly and categorically as to "free complishers", since any educational institution will never impede additional funding from such students.

So all contractors can relax a little, because for them the next 3 - 4 years will fly imperceptibly and without much excitement. However, what young professionals from them will turn out, even the question.

Another matter of state employees, because for them every semester turns into global stress and the real opportunity to get into the lists to deduct. With such students, the dean is not particularly courtesy, because those who want to be granted.

C-college study

Here you will have to not only demonstrate your excellent studies and a stupid desire for knowledge, but also a diligent behavior, participation in public events and a contact peaceful character.

The task of the student is to learn well and do not walk the pair. If it is still possible to stream in a college on pairs, then many subjects even after the release remain beyond the understanding. But how to learn well?

How well to study in college?

To be an exemplary and diligent student, it is not necessary to be a child - in advance. Some tricks, sociability and activity, and we can assume that "the case is in the hat." So how to succeed? There are several ways, and the most real among them are described in detail below:

1. Sport - the road to life. In any college, there is necessarily a team by a particular sport. It is very prestigious, and its participants are always relying "Training benefits" - this is as an unknown rule. So, if you become a member of such a team, we can assume that the red diploma is already in his pocket; After all, as you know, it is on athletes all the hopes that they represent the honor of college on numerous competitions and tournaments.

2. Public work. There are no trade union organizations in all commercial colleges, but activists will find in any collective. They are first participating in all competitions, KVN, ideas, and on holidays and are at all become the object of universal admiration, starters and main organizers. Such "pet pets" adore not only fellow students and representatives of the opposite sex, but even the most stringent teachers. So do not be surprised if the estimates on this or that object will sometimes be slightly overestimated.

3. Street group. Personally, I have not once again noticed that the group's headman is always an excellent student. The case is not at all in his intellectual abilities, but in the authority, which he has in the eyes of all teachers. Is it really such a responsible person who controls the whole group will put a deserved triple?

Of course, it is better to put the undeserved four, well, or the top five in advance, so to speak. This is one of those student injustices, which most often happens in real life.

4. Pets of the department. In the group, there are necessarily those students who teachers love more than others and consciously overestimate estimates. If you understand the psychology of the teacher, then you can also become such a pet; But the main thing is not to forget that fellow students are unlikely to appreciate such a friendliness with the teacher. But what can you do for diligent study and a red diploma for release.

5. Personal initiative. Sometimes, to learn great and to be in a good account with teachers, it is not necessary to easily flatter, to act and reptile, it is necessary to earn a sustainable authority in the eyes of teachers in the eyes of teachers. This at first glance seems impossible, but, as you know, it is: "It's only to try, and everything will work out."

How to earn a teacher confidence?

So every student can choose for himself that an effective way that he is especially close. In any case, you will have to work on the first two courses so that the remaining two seemed the most real sanatorium. Not in vain they say that "you earn the authority first, and then it works for you"! So everything is real, and with a competent approach of studying in college will become pleasant I remember in life.

Conclusion: Now I hope many applicants will stop shying the words "college", and, while studying in his walls, will demonstrate persistent knowledge in the future specialty.
